

NCR SYSTEM VALIDATORS

CAPABILITIES STATEMENT
CURRENT AUGUST 2020

Introduction to NCR System Validators, LLC

While NCR System Validators is a new name in the world of IT & Technical Services, we have years of experience in the DoD, Government, and commercial contracting arena. NCR's Management team understands the service needs of the most complex clients and organizations. Our personnel are chosen based on their experience & industry track record. This commitment to excellence will ensure successful results and, most importantly, a cost efficient bottom line for our clients.

NCR System Validator's IT services bring order to the complexities of enterprise computing. With a thorough understanding of government and industry IT requirements, we can minimize the risk of acquiring new technology and integrating legacy systems.

Federal agencies trust NCR System Validators to provide Client-Centric IT Solutions around the globe. NCR System Validators consistently delivers leading technology at a fair price, backed by expert support. From the DoD to Civil Agencies, customers choose us for fast response and for our global installation and network support.

Capabilities

NCR System Validators has Professionals working across a multitude of disciplines and industries. These include:

- Cyber Security
- Voice & IP Communications Services
- Program Management
- Network Engineering
- Network Support
- RMF and Cyber Certification Training

NCR System Validators, LLC

Company Capabilities

Cyber Security

NCR System Validators offers a variety of specialized information security services designed to reduce the risk and impact of unauthorized access to systems and data. Our information systems assurance professionals provide advice and offer best practices to help ensure that systems, and the processes they support, function as intended and that appropriate contingencies are in place to allow our clients to operate uninterrupted. By assessing all significant risks and ensuring they are being appropriately managed, our clients use their IT systems to better achieve business objectives. NCR System Validators has the expertise and experience in information security, information technology reviews and internal audits to provide insight necessary to fully understand how IT systems are being utilized and identify where the risks are.

Network Engineering

NCR System Validators is capable of applying system engineering analysis and discipline to the design, development, testing and deployment of the most complex and mission-critical hardware and software systems used by government and the military. NCR System Validators specializes in full life cycle system engineering to support client systems. This work includes designing, prototyping and testing new solutions to client's problems. Network Engineers at NCR System Validators ensure the systems are scalable, reliable, fully optimized and deliver quality performance.

NCR System Validators, LLC

Company Capabilities

Voice and IP Communications Services

Using the Cisco Lifecycle Services approach, Cisco and its partners provide a broad portfolio of IP Communications and Voice services that address all aspects of deploying, operating, and optimizing a customer's network to help increase business value and return on investment. NCR System Validators has architected 5000+ user systems for Voice Over IP networks, specified system hardware requirements, and implemented hardware through operational rollout.

Database Expertise

NCR System Validators has SQL & Oracle Server database experts for relational database design, database application development, disaster recovery planning/implementation, and database administration. Our personnel are involved with database architecture and design services from concept to realization. They also have the ability to engineer & architect complete disaster recovery and backup systems for Continuity of Operations/Continuity of Government.

Database Development Expertise: • SQL Server 2019 • Oracle 12-19C • Database Design • Data Migration • Data Replication • Data Backup/ Redundancy • Tuning/Optimization

NCR System Validators, LLC

Company Capabilities

Network Support

NCR System Validators provides Level II, and III network support to customers in a non-traditional way. By blending Tier 2 and 3 Level support, users have a much higher probability of finding a resolution on the first call. Redefining IT processes for the customer minimize support costs and ensure high levels of user satisfaction, enhance productivity, and effectively use resources. NCR System Validators System Administration services integrate into the overall infrastructure design and management of the customer's enterprise. By deploying next-generation applications and hardware for remote monitoring and employing proactive and preventative system management, NCR System Validators delivers high quality network support.
